

Pieper Electric, Inc. Forges OSHA/AGC Strategic Partnership

Effective Monday June 15th, 2009, Pieper Electric Inc., has achieved the “4-Star Level” as a Strategic Partner with OSHA and AGC of Greater Milwaukee. Additionally, the hope is to attain the highest, “5-Star Level” before the end of calendar year 2009.

Through a program that was jointly developed in 2001, members of the Occupational Health and Safety Administration and the AGC of Greater Milwaukee, established criteria and measurement tools to better define and recognize contractors with exceptional safety performance. The program was identified as the Construction Health and Safety Excellence (CHASE) Partnership. The benefit to all members being increased jobsite safety, a reduction in the hazards within the construction industry, and better communications between all parties .

The program details can be found on the AGC website at: www.agc-gm.org

While we are in constant pursuit of our mission to achieve zero accidents by the year 2012, this is a tremendous step for us. Congratulations.
